

CARPOOLING DURING COVID

Whether you are a rider or driver in a carpool, here are some ways to stay safe while sharing a ride.

- Don't ride or drive sick.
- Carry tissues in your vehicle to use when you cough, sneeze, or touch your face. Throw used tissues in the trash.
- Wear a mask. Request passengers sit in the back seat to maximize distance between passengers and drivers.
- Limit number of passengers (suggested maximum of 2 people per vehicle)
- Wipe down car seats, door handles, and seatbelts with disinfectant after every ride. Refrain from touching the car and items inside the car
- Let passengers handle their own personal items.
- Avoid using the recirculated air option for the car's ventilation during passenger transport; use the car's vents to bring in fresh outside air and/or lower the vehicle windows.
